Projekt-Nr.: 755

Position: Project Director (f/m)

## Project Director. Location: Ireland

We are seeking a Project Director for a leading international EPC Main Contractor to deliver a series of new build, state of the art Energy from Waste facilities. The immediate focus will be to deliver a £150m EfW project in Ireland. The project duration will be 3 years and following this you will be presented with the opportunity to deliver the next project or stay on the current project in another capacity, as once the plant is built, commissioning and operational, the Company will have the O&M contract for the next 15+ years.

## Candidate Requirements:

- Relevant qualifications in Construction or Civil Engineering
- Strong project management experience with the ability to produce, own and execute projects in line with the programme
- Construction experience gained working for EPC Contractor
- A proven track record in delivering projects on time and within budget
- Experience from pre-construction through to project close out and handover
- Projects delivered will consist of £multi-million EfW, Gasification, Biomass, Pharmaceutical, Water or other similar Power Generation or process industry plants
- Financially astute with the ability to manage project budget, costs, cash flow and margins
- Commercially aware with the ability to resolve any contractual issues arising with sub, contractors, supply chain or client
- The ability to develop strong relationships with stake holders, client representatives, authorities etc.
- Can manage sub-contractors and supply chain
- A strong leader and clear communicator with the ability to build and lead a team
- A track record of 'right first time' delivery
- A solid Health and Safety ethos
- No issue with being site based
